

Attention: New York State Independent Redistricting Commission,

We support the new map of the 50th assembly district. Please keep the proposed lines intact in the second round of drafts. The new lines identify two new communities of interest, while two long standing communities of interest remain undisturbed: **The Los Sures community and the Hasidic community of Williamsburg.** These communities need a strong voice in our city and state as gentrification, displacement, and antisemitism rise.

The new proposed AD50 map identifies our shoreline as a new community of interest. **The coastal hamlets of Greenpoint and Williamsburg are in direct danger as a result of the climate crisis, experiencing unprecedented population growth and rampant over-development because of the 2005 rezoning.** Wind vortices created by new towers, changes to the water table flow based on the amount of piles drilled into our coastline have created drastic wind changes and flooding. **We are the fastest growing neighborhood in NYC.** Our coastal neighborhoods desperately need many new issues addressed.

The second community of interest identified in this map are seniors who are **aging in place on fixed incomes.** 1 in 5 seniors in Brooklyn lives in poverty. With the end of pandemic food aid, our seniors will be struggling with rent, healthcare, and food like never before. We must prioritize the care of our most vulnerable neighbors.

1.5 million New Yorkers will receive less in food benefits once the federal assistance program ends in March. Our neighbors will be starving. We must eradicate food insecurity for all New Yorkers, and the new district highlights this life changing issue.

Title One schools in the proposed new district are facing severe cuts due to gentrification that need to be front and center. Children who live along our coast have noticed a decline in butterfly species in the past two years. Again, we ask you to

Attention: New York State Independent Redistricting Commission,

We support the new map of the 50th assembly district. Please keep the proposed lines intact in the second round of drafts. The new lines identify two new communities of interest, while two long standing communities of interest remain undisturbed: **The Los Sures community and the Hasidic community of Williamsburg.** These communities need a strong voice in our city and state as gentrification, displacement, and antisemitism rise.

The new proposed AD50 map identifies our shoreline as a new community of interest. **The coastal hamlets of Greenpoint and Williamsburg are in direct danger as a result of the climate crisis, experiencing unprecedented population growth and rampant over-development because of the 2005 rezoning.** Wind vortices created by new towers, changes to the water table flow based on the amount of piles drilled into our coastline have created drastic wind changes and flooding. **We are the fastest growing neighborhood in NYC.** Our coastal neighborhoods desperately need many new issues addressed.

The second community of interest identified in this map are seniors who are **aging in place on fixed incomes.** 1 in 5 seniors in Brooklyn lives in poverty.
