

I would like the New York State Redistricting Commission to consider the following factors as they plan for the new districts that will determine representation for Congressional, State Assembly and State Senate seats :

Educational Systems

Transportation Resources

Healthcare Facilities

Diversity/Ethnic populations

The new map for District 22 should include areas like Elmira, Corning, Ithaca, Syracuse which I believe would be a more valid representation of this area of the state.

Our current District map does not adequately represent these important factors.
